- Airspace and sectional charts
- Weather sources and effects
- Loading and performance
- Operations and emergency procedures
- Crew resource management and decision-making
- Radio communication and airport operations
- Physiology and maintenance

Included, and not included

- 24 classroom hours, an initial FAA test attempt and 12 months of practice-library access
- No flight time, aircraft use or flight proficiency certification
- No guaranteed employment, earnings or exam result

INAUGURAL COHORT

How the first 12 seats are filled.

The first 12 eligible respondents who confirm the final location and schedule will form our inaugural cohort. Additional respondents join the next-cohort waiting list.

1. **Respond**
   Name, city or ZIP, and preferred days and times. Timestamps set priority.
2. **Confirm**
   We offer the final location and schedule in response order. You confirm whether they work.
3. **Enroll**
   Confirmed participants pay $699 through a secure processor checkout to hold their seat.

Location

Our classroom location will be selected around the geographic concentration of the first cohort's participants, subject to suitable venue availability. Tell us your city or ZIP code and preferred schedule so we can plan a practical meeting location.

Delivery

In-person learning comes first. Our inaugural cohort meets face to face, with instructor-approved remote access available as an emergency accommodation when feasible. Emergency remote access is a backup arrangement, not a separately available online enrollment option.

Future fully remote cohorts are under consideration. Join the remote-interest list to receive updates.

EXAM CONFIDENCE COMMITMENT

Prepare to Pass—with KAI-Netics Behind You.

Complete the course and readiness requirements. If you don't pass your first FAA exam, receive a **personalized study plan** and **up to two additional hours of instructor-led group review** at no additional tuition charge.

Terms: Eligibility requires completing all 12 sessions, including approved makeups; completing assigned coursework; scoring at least 85% on three designated practice exams; and taking your first FAA exam within 30 days of course completion. Submit your unsuccessful exam report within 14 days to request support. Additional review is provided online within 30 days of an eligible request. Retest fees are the student's responsibility. This commitment provides additional preparation, not a guaranteed exam result.

Practical flight training

Hands-on flight instruction is a separate offering, priced separately.

Who can enroll

The FAA knowledge test requires a minimum age of 16. Learners under 18 need a parent or guardian to complete enrollment.
